## EXPERIENCE

Software Engineer (1.4 Year)  
PNW IT SERVICE PVT LTD

April 2023 - August 2024  
Noida, U.P.

- **Managed PayGlobal 360°**, a fintech system that secures txn. by validating them with comprehensive rules.
- **Integrated PayGlobal 360°** with legacy systems using TCP/IP, middleware, and JSON to enhance transaction processing.
- **Configured LDAP** for secure user authentication and role-based access control.
- **Conducted stand-alone and parallel system testing** to ensure performance and reliability.
- **Developed and tested APIs** for seamless data communication and real-time transaction handling.
- **Deployed and configured project** databases from inception on server infrastructure.
- **Implemented middleware for card statements** and transactional logs, enhancing data accuracy.
- **Applied Agile Scrum** for efficient project management and team collaboration.

## EDUCATION

Master of Computer of Application, MNNIT Allahabad, 8.17CPI

2020 - 2023

## SKILLS

Programming Languages -	C/C++, Linux, Shell Scripting, Java8, Python
DataBase -	SQL
Technical Expertise-	Object Oriented Programming And Concept, Data Base Management System, Data Structure & Algorithms, Rest API
Framework and Tools -	Spring Framework, AngularJS, Git, GitHub, GitBash, VS Code
Soft Skill -	Problem-Solving, Team Collaboration, Communication, Agile Methodologies, Deadline-oriented, SDLC

## PROJECT

### Authorization System

- **Technology used: [Full stack]:** Red Hat JBoss EAP, Apache Tomcat, Spring Framework, Java (JDK 1.8), JavaScript, Oracle, Redis Framework
- **Project Overview** Designed an authorization system for preauthorization checks and fraud detection
- **Functionality** Developed a transaction switch for routing from POS, ATMs, and online platforms to banks.
- **Features** Configured preauthorization rules, card generation, and statement features for credit transactions.
- **Implementation** Added reject indication mechanisms for failed transactions.
